Profile Summary

Full-stack Computer Science graduate with hands-on experience in building RESTful APIs using Node.js and Express.js, along with strong frontend development in React. Skilled in authentication, data validation, and database integration with MySQL and MongoDB. Passionate about building scalable and production-ready applications.

Technical Skills

Languages: Java, JavaScript, SQL (Basics)

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Shadcn UI, Responsive Design

State Management & Data Fetching: TanStack Query (React Query)

Backend : Node.js, Express.js, REST APIs, CRUD Operations, Zod Validations

Databases: MySQL, MongoDB

Auth & Services: Appwrite

Tools & Platforms: Git, GitHub, VS Code

Projects

ResiTrack – Smart Apartment Complaint Management System (In Progress)

[Code](#)

MongoDB, Express.js, Node.js, React

- Developed backend authentication system using JWT access tokens and refresh token strategy.
- Implemented secure APIs for user registration, login, logout, token refresh, and current user retrieval.
- Designed role-based access control for Resident, Admin, and Staff users using token payload.
- Built middleware for authentication and request validation using Zod schemas.
- Structured backend using modular MVC architecture with Express routes, controllers, and middleware.
- Designed MongoDB schemas and handled secure token storage for session management.

CoPath – Carpooling Web Application

[Live](#) [Code](#)

React, JavaScript, React Query, Appwrite, Tailwind CSS

- Designed and developed a responsive frontend using React and Tailwind CSS with a component-based architecture.
- Implemented authentication and authorization flows including protected routes and role-based dashboards (User, Driver, Admin).
- Built admin workflows for approving/rejecting driver requests and synced changes across dashboards and database.
- Integrated backend services using Appwrite for authentication, database operations, and role management.
- Managed server state and API interactions using TanStack React Query (queries, mutations, optimistic updates).
- Created reusable UI components and improved UX with loading states, toasts, and form validations.
- Ensured smooth data consistency between frontend UI and backend by handling real-time status updates.

Simons Challenge Game

[Live](#) [Code](#)

HTML, CSS, JavaScript

- Implemented game logic using JavaScript, including sequence generation, user input validation, and level progression.
- Managed state transitions such as game start, success, failure, and reset.
- Used DOM manipulation and event handling to provide real-time visual and audio feedback.
- Designed a simple, responsive UI using HTML and CSS.
- Improved user experience with animations and clear game status indicators.

Education

Kamala Institute of Technology and Science

Sep 2021 – Aug 2025

B.Tech in Computer Science and Engineering

CGPA: 7.67 / 10

IPS Prime Junior College

2019 – 2021

Intermediate (MPC)

Marks: 972 / 1000

Saint Thomas High School

2019

GPA: 10 / 10
